- 1) **Download FREE app** for your smart phone or go to www.hummingbirdsathome.org
- 2) **Pick a patch!** Choose a place that you can survey for hummingbirds, your backyard, a spot in a nearby park, your apartment balcony, your school playground....
- 3) **What's in your patch?** Watch your patch for at least 5 minutes and record any hummingbirds you see from and what they were feeding on.
- 4) **Tell us what you found!** If you spot a hummingbird, a flowering plant, and/or a feeding event outside of your scheduled patch survey, we want to know about it! Log these in as "Single Sightings".

Be Hummingbird Friendly!

Hummingbirds need a place to live and food just like people. Here's how you can help.

Provide year round flowers for food:

Winter – Manzanita, Gooseberry
Spring – Cleavland Sage, Red flowering Currant
Summer – Penstemmon, Red Columbine
Fall – California Fuchsia

Hummingbird nectar recipe:

4 parts hot water
1 part white sugar

Boil for 2 min.

NEVER use honey or artificial sweeteners. Avoid red food coloring.

Keep your feeder clean!

Clean with a solution of 1 part white vinegar to 4 parts water at least once a week, more frequently in warm weather, as it can spoil quickly. If your feeder has become dirty, try adding some grains of dry rice to the vinegar solution and shake vigorously. The grains act as a good abrasive. Rinse your feeder well with warm water three times before refilling with sugar solution.
